***Allowable Subject Matter***

1. Claims 1 - 3 are allowed.

***Reasons for Allowances***

2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 3 the applicant's invention of a male type rod-like connecting terminal an electrical connector comprising a rod-like terminal connecting portion provided at front end of the connecting terminal, said rod-like terminal connecting portion being connected to a corresponding female type connecting terminal of the electrical connector, and a wire clamping portion provided at a rear end of the connecting terminal, said wire clamping portion an electric wire being be connected, said rod-like connecting terminal being formed by bending and folding an electrically conductive metal plate, characterized in that said terminal connecting portion is consisting of a rod-like member having a substantially square cross section, said rod-like member being formed by bending upwardly both lateral sides of strip portion of the electrically conductive metal plate form raised portions, folding inwardly both upper ends of the raised portions and folding upwardly both the raised portions such that four layers of the -metal plate are stacked in a lateral direction and the raised portions are closely contacted with each other without producing any space within the terminal connecting portion.

The prior art of Fukuda et al. (US 6,077,131) discloses, a male type rod-like connecting terminal an electrical connector comprising a rod-like terminal connecting
